

Capture the Bigger Picture.

The VB400 is the next generation of body-worn camera technology. Rugged build quality. High performance. Multiple ways to connect. Delivering the features you need to take control of every situation. With full HD shift recording in 1080p, pre/post recording capabilities, and multiple ways to connect via Bluetooth and WiFi, the body-worn camera delivers transparency and protects people. Plus, the toughened exterior of the VB400 is military standard, allowing it to withstand the rigors of the job.

VB400 BODY-WORN CAMERA

TAKE CONTROL OF THE SITUATION

Always Ready to Record. Intuitive Operation for Immediate Results. Backed by the Motorola Solutions Unified Technology Ecosystem.

What's the solution for improved safety within situations involving safety in the workplace. Is the ability to record high quality video most important? Or is reliable, instant connection through Bluetooth and WiFi more pivotal in these instances?

Now you don't need to choose. With the new VB400 body-worn camera, you get it all.

The VB400 contains numerous features that facilitate efficient user control. The body-worn camera is designed to deliver transparency, protect people and prove professionalism. The strong connectivity of the product allows for live streaming, peer-assisted recording, and Bluetooth sensor monitoring.

A UNIFIED TECHNOLOGY ECOSYSTEM STAY CONNECTED. STAY IN CONTROL.

Your VB400 body-worn camera is a key part of your operation, keeping day-to-day activities documented on video and assisting in the face of emergencies. The device provides footage of events as they occur, allowing immediate response and providing indisputable evidence.

When implemented alongside fixed-video deployments and integrated with Avigilon Control Center (ACC™), activation of a VB400 camera generates a motion start event in ACC software and displays the camera's live video feed to the system operator alongside video feeds from fixed cameras.

The VB400 and associated software are simple to use, easy to integrate and designed for every-day operations. Whether you're streaming live footage to ACC, capturing full incidents using configurable pre and post-record functions, or activating multiple cameras using Bluetooth sensor monitoring, the VB400 is connected for an efficient and smarter response.

In addition to integration with the ACC, you can take that crucial connectivity to the next level and gain another perspective during high-stress situations by incorporating the MOTOTRBO R7. When a MOTOTRBO R7 enters an emergency state, a paired VB400 will be prompted to record immediately - no user intervention required.

MOTOTRBO R7 brings the Motorola Solutions unified technology ecosystem to the palm of your hand. Stream live video from security cameras and other devices, then share those clips with your teams. See real-time alerts from access control and analytics based sensors configured through our workflow automation tool.

By seamlessly integrating video security and analytics, command center software and critical communications technologies, you can simplify management and easily automate custom workflows. Now, you can more effectively detect, analyze, communicate and respond to any security and operational threats.

VIDEO FLEXIBLE AND SCALABLE TO YOUR NEEDS

The needs of your organization are unique. That's why we built a VideoManager, integrated with the purchase of the VB400 body-worn camera, to suit everyone. Whether you have 100 cameras or 10,000, there's a VideoManager solution to enhance the capabilities of the VB400 body-worn camera via a seamless, intuitive and highly configurable software experience. Security and workflow optimization take center stage. Customizable roles and device profiles control system access and audit logs provide the all-important evidential trail required to support the judicial process.

ALWAYS BE ON WITH VB400 BODY-WORN CAMERA

With the VB400 body-worn camera, teams stay connected and in control. Video capabilities and workflows are unified and simplified. Explore the VB400 body-worn camera and experience how the power of the Motorola Solutions technology ecosystem can transform your operations.
