

CANADIAN CENTRE FOR CYBER SECURITY (CCCS)

The Canadian Centre for Cyber Security (the Cyber Centre) is part of the Communications Security Establishment. It is the single unified source of expert advice, guidance, services and support on cyber security for Canadians.

To assure a safe and secure environment for operations, The Canadian Centre for Cyber Security has instituted a comprehensive and rigorous evaluation process for companies offering cloud services.

Motorola Solutions Canada Inc. has received a Security Assessment from the Canadian Centre for Cyber Security on multiple cloud-hosted products that are now available in Microsoft Azure Canada.

Motorola Solutions assessment included the following Cloud Service Platforms:

COMMANDCENTRAL EVIDENCE

A complete digital evidence management system for body worn cameras, in-car videos, interview room videos, fixed surveillance videos and all other digital assets.

COMMANDCENTRAL AWARE

SaaS-based offer for a comprehensive situational awareness command and control for law enforcement and security professionals. Includes product family members of CommandCentral Community, CommandCentral Responder, CommandCentral...

SMARTCONNECT

Automatically switches your voice channel to an LTE broadband or Wi-Fi network whenever LMR is unavailable or falls below RSSI, then back again when you return coverage on your smart radios. The switchover is fast (typically less than 3 secs), and requires no user intervention. Voice communications are sent over broadband or Wi-Fi unchanged, so radio functionality and voice quality are maintained.

SMARTMESSAGING

The multimedia communication tool that runs on your smart radio. Designed specifically for public safety users, it's a secure and convenient way to share and view texts, pictures, videos and voice notes across your extended team.

SMARTMAPPING

Shares location information on a map - right on your radio - for enhanced situational awareness in the field. See your location, find an address, drop waypoints, and stay in touch with the situation. View the location of other units at a glance. Quickly pinpoint colleagues in distress.

SMARTLOCATE

Routes radio GPS information over broadband networks for faster location updates. Dispatchers and radio users can now track first responder locations, in CommandCentral or SmartMapping, with improved accuracy, especially during fast-moving situations.

RADIOCENTRAL

Coupled with SmartProgramming allows you to view and program your entire radio fleet from a single interface. Transform how you manage codeplug templates to reduce repetitive actions. Multiple organizations can be managed with the same account with role based permissions and agency partitioning. Initial programming, software, security updates and radio data collections can be sent at any time, anywhere utilizing the higher speed bandwidth and extended coverage of the LTE network.

CRITICAL CONNECT

Provides the seamless exchange between voice and data, making it possible to quickly set-up interoperable communications between agencies across LMR networks. Simple, flexible and scalable - it can connect to.

WAVE PTT

The Push to Talk (PTT) app that instantly connects your team across different devices, networks, and locations.

We invite you to discuss your thoughts or any questions with us by contacting your Motorola Solutions Account Executive.
